

# Regional Collection System Odor Control Stations

The **Orange County Sanitation District** (OCSD) serves 2.5 million people in both central and north Orange County, California. OCSD is responsible for safely collecting, treating and disposing of the wastewater by operating and maintaining two regional wastewater treatment plants: Reclamation Plant No. 1 in Fountain Valley, and Treatment Plant No. 2 in Huntington Beach.

The Odor and Corrosion Control Program at OCSD serves to minimize regional collection system odors in the communities served, extend the useful life of the regional collection system by reducing corrosion, and optimize/integrate the odor control program in the collection system with the two treatment plants.
